- A. Educational reforms have been instituted by the Communists in the Northeast. Each of the primary and middle schools and the universities has a Communist Party member who serves as political instructor and directs the political activity of the school. The vice-principal is also a party member, and it is he who controls the school administrative committee. This committee is composed of representatives from the students and teachers associations, the secretary of the local branch headquarters of the Communist Party, and the secretary of the local headquarters of the Communist youth corps.
- 2. A new grading system was adopted in the Northeast at the beginning of March 1950, similar to that used in the USSR. It is devised to differentiate more closely between students. A five-point rating is used, as follows:
 - 5 Students who understand fully what they have been taught, who are capable of applying what they have learned, and who actually do apply their theoretical knowledge.
 - 4 Students who understand fully what they have been taught and are capable of applying their knowledge but do not do so completely.
 - 3 Students who understand fully but are unable to apply what they have learned.
 - 2 Students who understand only partly what they are taught and are unable to apply any of their knowledge.
 - 1 Students who understand only vaguely the material to which they are exposed.

This document is hereby regraded to CONFIDENTIAL in accordance with the letter of 16 October 1978 from the Director of Central Intelligence to the Archivist of the United States.
